SURVEY BACKGROUND

About The National Citizen Survey™

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA).

The National Citizen Survey™ was developed to provide local jurisdictions an accurate, affordable and easy way to assess and interpret resident opinion about important community issues. While standardization of question wording and survey methods provide the rigor to assure valid results, each jurisdiction has enough flexibility to construct a customized version of The National Citizen Survey™ that asks residents about key local services and important local issues.

Results offer insight into residents' perspectives about local government performance and as such provide important benchmarks for jurisdictions working on performance measurement. The National Citizen Survey™ is designed to help with budget, land use and strategic planning as well as to communicate with local residents. The National Citizen Survey™ permits questions to test support for local policies and answers to its questions also speak to community trust and involvement in community-building activities as well as to resident demographic characteristics.

The survey and its administration are standardized to assure high quality survey methods and comparable results across The National Citizen Survey™ jurisdictions. Participating households are selected at random and the household member who responds is selected without bias. Multiple mailings give each household more than one chance to participate with self-addressed and postage paid envelopes. Results are statistically weighted to reflect the proper demographic composition of the entire community. The National Citizen Survey™ customized for this jurisdiction was developed in close cooperation with local jurisdiction staff. The City of Richmond staff selected items from a menu of questions about services and community problems; they defined the jurisdiction boundaries we used for sampling; and they provided the appropriate letterhead and signatures for mailings. City of Richmond staff also determined local interest in a variety of add-on options for The National Citizen Survey™ Basic Service.

One of the add-on options that Richmond chose was to have crosstabulations of evaluative questions 1-16a by demographic questions 19 (number of years living in Richmond), 28 (ethnicity), 29 (race) and question 30 (age).

The following page contains the frequency of responses for each demographic variable selected for the report.

Question 19: Length of Residency

How many years have you lived in Richmond?

Less than 2 years	14%
2 to 5 years	20%
6 to 10 years	16%
11 to 20 years	18%
More than 20 years	33%
Total	100%

Question 28: Ethnicity

	No	Yes	Total
Are you Spanish/Hispanic/Latino?	78%	22%	100%

Question 29: Race

What is your race?	Percent of Respondents
American Indian or Alaskan native	1%
Asian or Pacific Islander	15%
Black, African American	29%
White/Caucasian	40%
Other	20%
Total may exceed 100% as respondents could select more than one category.	

Question 30: Age

In which category is your age?

18 to 24 years	4%
25 to 34 years	25%
35 to 44 years	16%
45 to 54 years	25%
55 to 64 years	16%
65 to 74 years	8%
75 years or older	5%
Total	100%

UNDERSTANDING THE RESULTS

“Don’t Know” Responses

On many of the questions in the survey respondents may answer “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A of the Report of Results. However, these responses have been removed from the analyses presented in this report. In other words, the tables display the responses from respondents who had an opinion about a specific item.

Putting Evaluations onto a 100-Point Scale

Although responses to many of the evaluative questions were made on a 4 point scale with 1 representing the best rating and 4 the worst, many of the results in this summary are reported on a common scale where 0 is the worst possible rating and 100 is the best possible rating. If everyone reported “excellent,” then the result would be 100 on the 100-point scale. Likewise, if all respondents gave a “poor” rating, the result would be 0 on the 100-point scale. If the average rating for quality of life was “good,” then the result would be 67 on a 100-point scale; “fair” would be 33 on the 100-point scale.

Understanding the Tables

In this report, comparisons between demographic subgroups are shown. For most of the questions, we have shown only one number for each question. Usually this number is the rating on a 100-point scale. Sometimes this scale was not appropriate to use. In these cases we have summarized responses to show only the proportion of respondents giving a certain answer; for example, the percent of respondents who reported a crime, or the percent of respondents who felt the rate of growth was “about right.” For a few questions, we have shown the full set of responses: these include the policy questions and the question about respondents’ perceptions about the economy.

Anova and chi square tests of significance were applied to these comparisons of survey questions by demographic subgroups. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between subgroups are due to chance; or in other words, a greater than 95% probability that the differences observed are “real.” Where differences were statistically significant, they are marked in gray.

COMPARISONS

Quality of Life Ratings																
	How many years have you lived in Richmond?					Are you Spanish/Hispanic/Latino?		Race		In which category is your age?						
	Less than 2 years	2 to 5 years	6 to 10 years	11 to 20 years	More than 20 years	No	Yes	White	Non-white	18 to 24 years	25 to 34 years	35 to 44 years	45 to 54 years	55 to 64 years	65 to 74 years	75 years or older
