SURVEY BACKGROUND

About The National Citizen Survey™

The National Citizen Survey[™] (The NCS[™]) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA).

The survey and its administration are standardized to assure high quality survey methods and comparable results across The National Citizen Survey^M jurisdictions. Participating households are selected at random and the household member who responds is selected without bias. Multiple mailings give each household more than one chance to participate with self-addressed and postage paid envelopes. Results are statistically weighted to reflect the proper demographic composition of the entire community.

The National Citizen Survey[™] customized for this jurisdiction was developed in close cooperation with local jurisdiction staff. The City of Richmond staff selected items from a menu of questions about services and community problems; they defined the jurisdiction boundaries NRC used for sampling; and they provided the appropriate letterhead and signatures for mailings. City of Richmond staff also determined local interest in a variety of add-on options to The National Citizen Survey[™] Basic Service.

UNDERSTANDING THE RESULTS

Survey Administration

Following the mailing of a pre-survey notification postcard to a random sample of 3,000 households, surveys were mailed to the same residences approximately one week later. A reminder letter and a new survey were sent to the same households after two weeks. Residents were also able to complete the survey on the Internet. Approximately 141 postcards were undeliverable due to "vacant" or "not found" addresses. Of the 2,859 eligible households, 610 completed the survey providing a response rate of 21%. Of the 610, 594 written surveys were received and 16 surveys were completed online. Typically, the response rates obtained on citizen surveys range from 20% to 40%.

Selected households received three mailings, one week apart, beginning March 19, 2007. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the city manager inviting the household to participate, a questionnaire and postage-paid return envelope. The final mailing contained a reminder letter and another survey and postage-paid return envelope. Completed surveys were collected over the following 6 weeks. Households were also able to participate in the survey on the Internet. The City of Richmond elected to make reminder telephone calls to households that did not respond to the survey. On a few occasions, as requested, the City sent a replacement questionnaire for completion.

It is customary to describe the precision of estimates made from surveys by a "level of confidence" (or margin of error). The 95 percent confidence level for this survey of 610 residents is generally no greater than plus or minus 4 percentage points around any given percent reported for the entire sample. In theory, in 95 cases out of 100, the results based on such samples will differ by no more than 4 percentage points in either direction from what would have been obtained had responses been collected from all Richmond adults.

The results were weighted to reflect the demographic profile of all residents in the City of Richmond. (For more information on the survey methodology, see Appendix B. A copy of the survey materials can be found in Appendix C.)

Survey Validity

The question of survey validity has two parts: 1) how can we be confident that the results from our sample are representative of the results we would have gotten had we administered the survey to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

Understanding the Results

To answer the first question, we use the best survey research practices for the resources spent to assure that the results from the sample reflect the opinions of residents in the entire jurisdiction. These practices include:

- 1. Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent.
- 2. Selecting households at random within the jurisdiction.
- 3. Over-sampling attached units to improve response from hard-to-reach, lower income, or younger apartment dwellers.
- 4. Selecting the respondent within the household using an unbiased sampling procedure¹.
- 5. Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- 6. Soliciting response on jurisdiction letterhead signed by the highest ranking elected official or staff member.
- 7. Providing a self-addressed, postage-paid return envelope.
- 8. Offering the survey in Spanish when appropriate and requested by City officials.
- 9. Using the most recent available information about the characteristics of jurisdiction residents to weight the data to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g. reporting tolerant behaviors toward "oppressed groups," likelihood of voting a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), her confidence that she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g. driving

¹ The birthday method requests that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.

Understanding the Result

habits), reported intentions to behave with observed future behavior (e.g. voting choices) or reported opinions about current community quality with objective characteristics of the community (e.g. feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g. family abuse or other illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality tend to be ambiguous, some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of fire fighters, breadth of services and training provided). Whether some research confirms or disconfirms that relationship between what residents think about a community and what can be seen "objectively" in a community, we have argued that resident opinion is a perspective that cannot be ignored by government administrators. Elsewhere we have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

Use of the "Excellent, Good, Fair, Poor" Response Scale

The scale on which respondents are asked to record their opinions about service and community quality is "excellent," "good," "fair" or "poor" (EGFP). This scale has important advantages over other scale possibilities (very good to very bad; very satisfied to very dissatisfied; strongly agree to strongly disagree, as examples). EGFP is used by the plurality of jurisdictions conducting citizen surveys across the U.S. The advantage of familiarity is one we did not want to dismiss because elected officials, staff and residents already are acquainted with opinion surveys measured this way. EGFP also has the advantage of offering three positive options, rather than only two, over which a resident can offer an opinion. While symmetrical scales often are the right choice in other measurement tasks, we have found that ratings of almost every local government service in almost every jurisdiction tend, on average, to be positive (that is, above the scale midpoint). Therefore, to permit finer distinctions among positively rated services, EGFP offers three options across which to spread those ratings. EGFP is more neutral because it requires no positive statement of service quality to judge (as agree-disagree scales require) and, finally, EGFP intends to measure absolute quality of service delivery or community quality (unlike satisfaction scales which ignore residents' perceptions of quality in favor of their report on the acceptability of the level of service offered).

Understanding the Results

"Don't Know" Responses

On many of the questions in the survey respondents may answer "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the body of the report. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

For two of the items related to crime victimization and crime reporting, "don't know" responses were not removed. These questions were not evaluative; rather, respondents were asked if they or any member of their household had been a victim of a crime within the last year. If they were, they were then asked whether the crime had been reported to police.

Putting Evaluations Onto a 100-Point Scale

Although responses to many of the evaluative questions were made on a 4 point scale with 1 representing the best rating and 4 the worst, many of the results in this summary are reported on a common scale where 0 is the worst possible rating and 100 is the best possible rating. If everyone reported "excellent," then the result would be 100 on the 100-point scale. Likewise, if all respondents gave a "poor" rating, the result would be 0 on the 100-point scale. If the average rating for quality of life was "good," then the result would be 67 on a 100-point scale; "fair" would be 33 on the 100-point scale. The 95 percent confidence interval around an average score on the 100-point scale is no greater than plus or minus 2 points based on all respondents.

The average captures the lowest and the highest ratings and everything in between. As a single summary of results, the average—converted to the 100 point scale to make for easier understanding—is better than reporting the sum of percentages in the positive rating options.

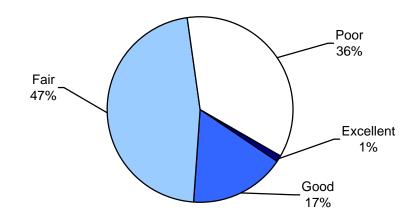

COMMUNITY LIFE

The National Citizen SurveyTM contained many questions related to the life of residents in the community. Survey participants were asked to rate their overall quality of life, as well as other aspects of quality of life in Richmond. They also evaluated characteristics of the community, and gave their perceptions of safety in the City of Richmond. The questionnaire assessed use of the amenities of the community and involvement by respondents in the civic and economic life of Richmond.

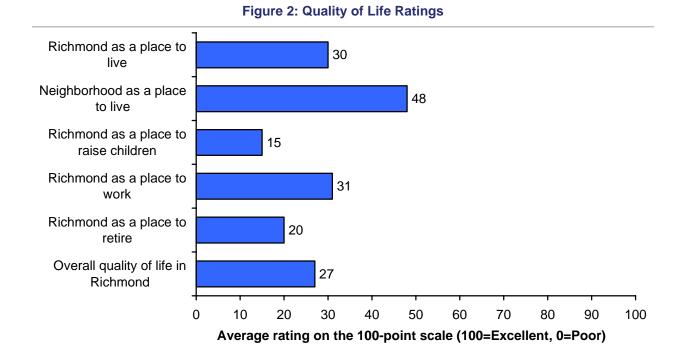

Quality of Life

When asked to rate the overall quality of life in Richmond, 1% of respondents thought it was "excellent." Thirty-six percent rated overall quality of life as "poor." All of the responses of residents who had an opinion about the overall quality of life in Richmond are shown in Figure 1 below. Other ratings can be seen in the figures on the following page.

Community Life

Ratings of Community Characteristics in Richmond

The highest rated characteristics of Richmond were openness and acceptance, overall quality of new development, and opportunities to attend cultural activities. When asked about potential problems in Richmond, the three concerns rated by the highest proportion of respondents as a "major problem" were quality of public school education, unsupervised youth, and quality of school facilities. The rate of population growth in Richmond was viewed as "too fast" by 50% of respondents, while 11% thought it was "too slow."

Community Life

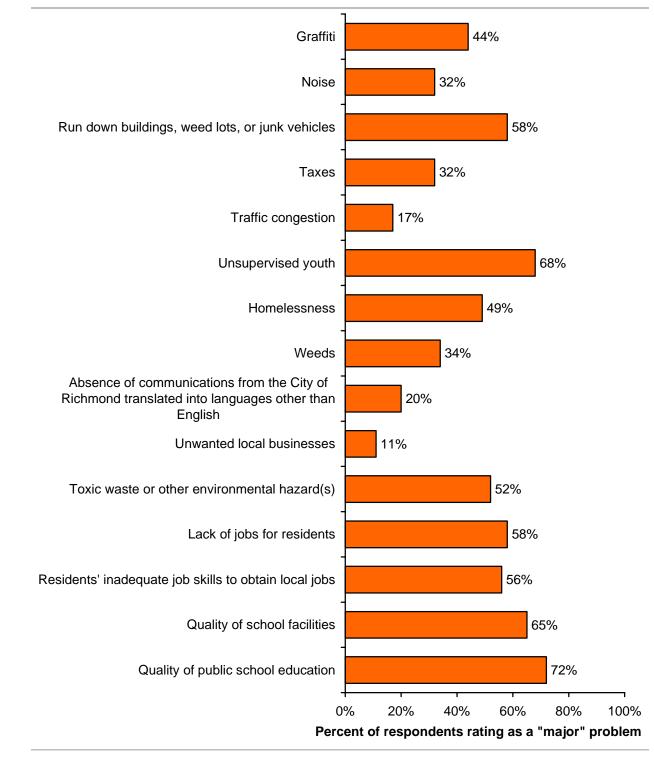

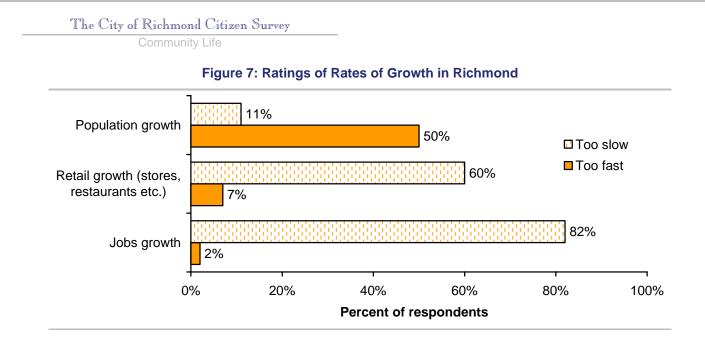

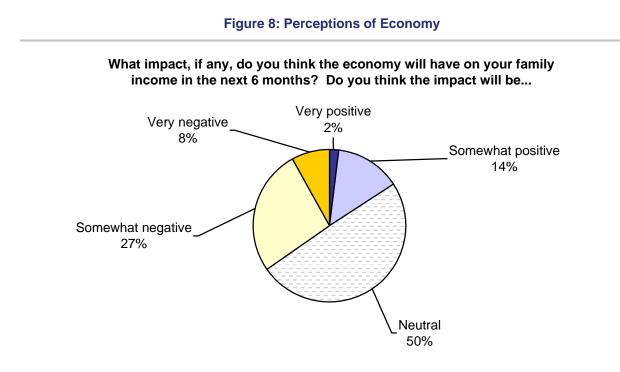

Figure 6: Ratings of Potential Problems in Richmond

Report of Results

Community Life

Sixteen percent of Richmond residents expected that the coming six months would have a somewhat or very positive impact on their family, while 35% felt that the economic future would be somewhat or very negative.

Community Life

Perceptions of Safety

When evaluating safety in the community, 13% of respondents felt "somewhat" or "very safe" from violent crimes in Richmond. In their neighborhood after dark, 34% of survey participants felt "somewhat" or "very safe."

As assessed by the survey, 30% of households reported that at least one member had been the victim of one or more crimes in the past year. Of those who had been the victim of a crime, 76% had reported it to police.

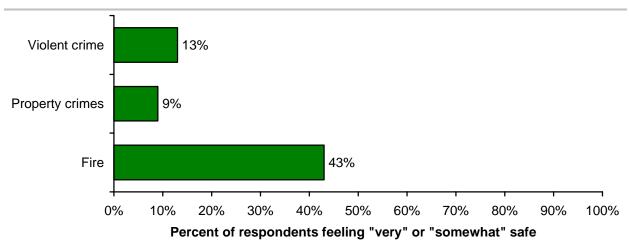

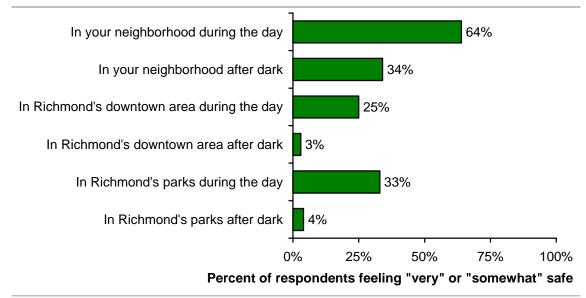

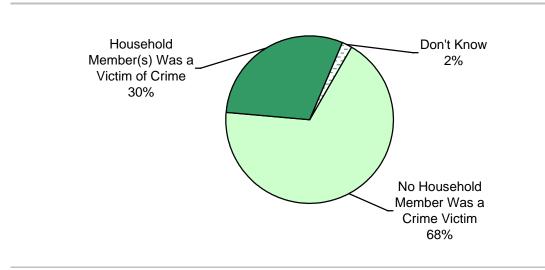

Figure 9: Ratings of Safety from Various Problems in Richmond

Figure 10: Ratings of Safety in Various Areas in Richmond

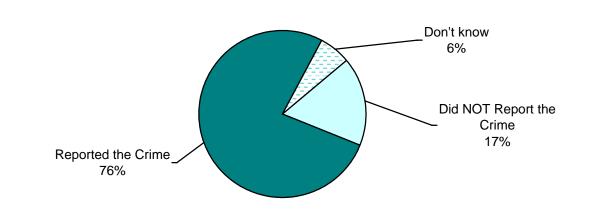

Community Life

Figure 11: Percent of Respondents' Households That Were Victim of a Crime in the Last 12 Months

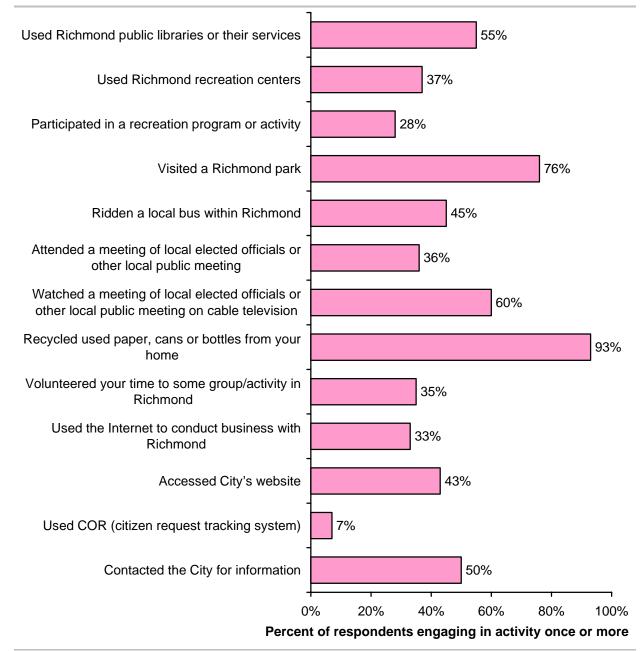

Community Life

Community Participation

Participation in the civic, social and economic life of Richmond during the past year was assessed on the survey. The proportion of respondents engaging in various activities is shown in the chart below. Among those completing the questionnaire, 76% reported visiting a park in Richmond in the past year and 36% had attended a meeting of elected officials or other local public meeting.

² In general on a survey, a greater proportion of people will report having voted, than actual voting records verify.

LOCAL GOVERNMENT

Several aspects of the government of the City of Richmond were evaluated by residents completing The National Citizen Survey^M. They were asked how much trust they placed in their local government, and what they felt about the services they receive from the City of Richmond. Those who had any contact with a City of Richmond employee in the past year gave their impressions of the most recent encounter.

Public Trust

When asked to evaluate whether they felt they received good value for taxes they pay, residents gave an average rating of 34 on a 100-point scale.

Service Provided by Richmond

The responses of residents with an opinion about the overall quality of services provided by Richmond are shown in Figure 16 below. These responses result in an average rating of 28 on the 100-point scale. Average ratings given to specific services are shown on the following pages.

Local Government

On average, residents of Richmond gave the highest evaluations to their own local government and the lowest average rating to the federal government.

APPENDIX B: SURVEY METHODOLOGY

The National Citizen SurveyTM was developed to provide local jurisdictions an accurate, affordable and easy way to assess and interpret resident opinion about important community issues. While standardization of question wording and survey methods provide the rigor to assure valid results, each jurisdiction has enough flexibility to construct a customized version of The National Citizen SurveyTM that asks residents about key local services and important local issues.

Results offer insight into residents' perspectives about local government performance and as such provide important benchmarks for jurisdictions working on performance measurement. The National Citizen SurveyTM is designed to help with budget, land use and strategic planning as well as to communicate with local residents. The National Citizen SurveyTM permits questions to test support for local policies and answers to its questions also speak to community trust and involvement in community-building activities as well as to resident demographic characteristics.

Sampling

Approximately 3,000 households were selected to participate in the survey using a stratified systematic sampling method.³ An individual within each household was selected using the birthday method.⁴

Survey Administration

Selected households received three mailings, one week apart, beginning March 19, 2007. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the city manager inviting the household to participate, a questionnaire and postage-paid return envelope. The final mailing contained a reminder letter and another survey and postage-paid return envelope. Completed surveys were collected over the following 6 weeks. Households were also able to participate in the survey on the Internet. An alpha-numeric code was assigned to each household and printed on the survey cover letters. This code was used to access the survey online.

The City of Richmond elected to make reminder telephone calls to households that did not respond to the survey after the final survey mailing. National Research Center delivered to the City a list of all available phone numbers for appropriate households. The City contacted those households and requested that each complete and return the survey. On a few occasions, as requested, the City sent a replacement questionnaire for completion.

³ Systematic sampling is a method that closely approximates random sampling by selecting every Nth address until the desired number of households is chosen.

⁴ The birthday method is a process to remove bias in the selection of a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys but leaving selection of respondent to household members will lead to bias.

Appendix B: Survey Methodology

Response Rate and Confidence Intervals

Of the 2,859 eligible households, 610 completed the survey providing a response rate of 21%. Approximately 141 addresses sampled were "vacant" or "not found.⁵" In general, the response rates obtained on citizen surveys range from 20% to 40%. The sample of households was selected systematically and impartially from a list of residences in the United States maintained by the U.S. postal service and sold to NRC through an independent vendor. For each household, one adult, selected in an unbiased fashion, was asked to complete the survey. The sample drawn for Richmond used USPS data to approximate the geographic boundaries of the jurisdiction, though some households just outside the city limits may have received surveys. The survey completers who technically do not reside in the jurisdiction may choose to respond to the survey because they feel an affiliation with the jurisdiction and its services. Local governments often have a sphere of influence – providing in-jurisdiction services that perimeter-residents use or even providing services outside the jurisdiction boundaries.

In theory, in 95 cases out of 100, the results based on such samples will differ by no more than 4 percentage points in either direction from what would have been obtained had responses been collected from all Richmond adults. This difference is also called a "margin of error.⁶" This difference from the presumed population finding is referred to as the sampling error. For subgroups of responses, the margin of sampling error is larger. In addition to sampling error, the practical difficulties of conducting any survey of the public may introduce other sources of error. For example, the failure of some of the selected adults to participate in the sample or the difficulty of including all sectors of the population, such as residents of some institutions or group residences, may lead to somewhat different results.

Weighting and Analyzing the Data

The surveys were analyzed using the SPSS statistical package. Frequency distributions and average (mean) ratings are presented in the body of the report.

The demographic characteristics of the sample were compared to those of the City of Richmond as reflected in the information sent by staff to National Research Center, Inc. When necessary, survey results were statistically adjusted to reflect the known population profile.

Generally, two variables are used in a weighting scheme. Known population characteristics are compared to the characteristics of survey respondents. Characteristics chosen as weighting variables are generally selected because they are not in proportion to what is shown in a jurisdiction's demographic profile and because differences in opinion are observed between subgroups of these characteristics. The two socioeconomic characteristics that were used to weight the survey results were tenure and gender/age. Other discrepancies between the whole population and the sample were also aided by the weighting due to the intercorrelation of many

⁵ "Eligible" households refer to addresses that belong to residences that are not vacant within the City of Richmond.

⁶ The margin of error was calculated using the following formula: 1.96 * square root (0.25/610). This margin of error is calculated in the most conservative way. The standard error was assumed to be the greatest for a binomial distribution: 50%/50%.

Appendix B: Survey Methodology

socioeconomic characteristics, although the percentages are not always identical in the sample compared to the population norms. The results of the weighting scheme are presented in the table on the following page.

APPENDIX C: SURVEY MATERIALS

The following pages contain copies of the survey materials sent to randomly selected households within the City of Richmond. All households selected for inclusion in the study were first sent a prenotification postcard informing them that they would be receiving a questionnaire within the following week. A week later, a cover letter and survey were sent, with a postage paid return envelope. Two weeks later a second cover letter and survey were sent. The second cover letter asked that those who had responded not do so again, while urging those who had not yet returned their surveys to please do so.

March 2007

Dear Richmond Resident:

The City of Richmond wants to know what you think about our community and City services. You have been randomly selected to participate in Richmond's 2007 Community Survey.

En este documento la Ciudad le da a usted una oportunidad importante para decirnos lo que piensa de los servicios de la Ciudad, y su opinión de la calidad de vida aquí en Richmond. Se seleccionó su hogar al azar para participar en esta encuesta. Si usted no puede hacer la encuesta incluida en inglés, por favor llámenos al número 510-231-3031 para pedir una copia de la encuesta en español. Todas sus respuestas quedarán completamente anónimas. ¡Esperamos sus opiniones! Favor de entregar la encuesta en el sobre adjunto, con el costo postal pagado. Muchas gracias.

Please take a few minutes to fill out the enclosed Community Survey. Your answers will help the City Council make decisions that affect our community. You should find the questions interesting and we will definitely find your answers useful. Please participate!

To get a representative sample of Richmond residents, the adult (anyone 18 years or older) in your household who most recently had a birthday should complete this survey. Year of birth of the adult does not matter.

Please have the appropriate member of the household spend a few minutes to answer all the questions and return the survey in the enclosed postage-paid envelope. Your responses will remain completely anonymous.

You may complete the survey online, if you would prefer, at http://www.n-r-c.com/survey/richmond.htm. To complete the survey online, you will need to enter the special code printed in the upper left corner of this letter.

Your participation in this survey is very important – especially since your household is one of only a small number of households being surveyed. If you have any questions about the Community Survey, please call 510-231-3031. Please help us shape the future of Richmond. Thank you for your time and participation.

Sincerely,

William A. Lindsay City Manager/ Gerente de la Ciudad

April 2007

Dear Richmond Resident:

About one week ago, you should have received a copy of the enclosed survey. If you completed it and sent it back, we thank you for your time and ask you to discard this survey. Please do not respond twice. If you have not had a chance to complete the survey, we would appreciate your response. The City of Richmond wants to know what you think about our community and City services. You have been randomly selected to participate in the City of Richmond Community Survey.

Hace como una semana, usted debió de haber recibido una copia de la encuesta. Si ya la completó y la regresó, le agradecemos por su tiempo y le pedimos que no llene esta encuesta. En este documento la Ciudad le da a usted una oportunidad importante para decirnos lo que piensa de los servicios de la Ciudad, y su opinión de la calidad de vida aquí en Richmond. THE CITY OF RICHMOND 2007 COMMUNITY SURVEY

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Please circle the response that most closely represents your opinion for each question. Your responses are anonymous and will be reported in group form only.

1. Please circle the number that comes closest to your opinion for each of the following questions:

<u>Exc</u>	cellent	Good	Fair	Poor	Don't know
How do you rate Richmond as a place to live?	.1	2	3	4	5
How do you rate your neighborhood as a place to live?	.1	2	3	4	5
How do you rate Richmond as a place to raise children?	.1	2	3	4	5
How do you rate Richmond as a place to work?	.1	2	3	4	5
How do you rate Richmond as a place to retire?	.1	2	3	4	5
How do you rate the overall quality of life in Richmond?	.1	2	3	4	5

2. Please rate each of the following characteristics as they relate to Richmond as a whole:

	Excellent	Good	<u>Fair</u>	Poor	<u>Don't know</u>
Sense of community	1	2	3	4	5
Openness and acceptance of the community towards people	of				
diverse backgrounds	1	2	3	4	5
Overall appearance of Richmond		2	3	4	5
Opportunities to attend cultural activities	1	2	3	4	5
Shopping opportunities	1	2	3	4	5
Shopping opportunities	1	2	3	4	5
Recreational opportunities	1	2	3	4	5
Job opportunities	1	2	3	4	5
Access to affordable quality housing	1	2	3	4	5
Access to affordable quality child care	1	2	3	4	5
Access to affordable quality health care	1	2	3	4	5
Access to affordable quality food	1	2	3	4	5
Ease of car travel in Richmond	1	2	3	4	5
Ease of bus travel in Richmond		2	3	4	5
Ease of rail/subway travel in Richmond	1	2	3	4	5
Ease of bicycle travel in Richmond	1	2	3	4	5
Ease of walking in Richmond	1	2	3	4	5
Educational opportunities	1	2	3	4	5
Overall image/reputation of Richmond	1	2	3	4	5
Overall quality of new development in Richmond	1	2	3	4	5

3. Please rate the speed of growth in the following categories in Richmond over the past 2 years:

	Much	Somewhat	Right	Somewhat	Much	Don't
	too slow	too slow	<u>amount</u>	<u>too fast</u>	<u>too fast</u>	<u>know</u>
Population growth	1	2	3	4	5	6
Retail growth (stores, restaurants etc.)		2	3	4	5	6
Jobs growth	1	2	3	4	5	6

4. To what degree, if at all, are the following problems in Richmond:

 - O 18-24 years O 55-64 years
 - O 25-34 years O 65-74 years
 - O 35-44 years O 75 years or older
 - O 45-54 years
- **31. What is your sex?** O Female O Male
- **32.** Are you registered to vote in your jurisdiction? O No O Yes O Don't know
- **33. Did you vote in the last election?** O No O Yes O Don't know
- 34. Are you likely to vote in the next election?ONoOYesODon't know

Thank you for completing this survey. Please return the completed survey in the postage paid envelope to: National Research Center, Inc., 3005 30th St., Boulder, CO 80301

Marzo 2007

Estimado(a) residente de Richmond:

La Ciudad de Richmond desea saber qué piensa usted sobre la comunidad y los servicios de la Ciudad. Su hogar es uno de entre algunos hogares seleccionados al azar para participar en la Encuesta de la Comunidad de la Ciudad de Richmond 2007.

Por favor tome unos pocos minutos para llenar esta Encuesta de la Comunidad. Sus respuestas ayudarán a que el Concejo de la Ciudad tome decisiones para mejorar los servicios a nuestra comunidad. Encontrará que las preguntas son interesantes y nosotros definitivamente encontraremos que sus respuestas serán útiles. ¡Por favor participe!

Para obtener una verdadera muestra representativa de los residentes de Richmond, solicitamos que llene la encuesta el adulto que haya tenido su cumpleaños más recientemente. La edad del adulto no importa siempre que tenga 18 años de edad o más. Al seleccionar de ésta forma a la persona que debe llenar la encuesta, se asegura que la encuesta en los hogares de la Ciudad mejorara la exactitud de los resultados. Por favor tenga usted la seguridad de que se mantendrán anónimas.

Por favor, haga que el adecuado miembro del hogar pase unos minutos contestando todas las preguntas y devuelva la encuesta en el sobre adjunto con el costo postal pagado. Si tiene alguna pregunta acerca de la Encuesta de la Comunidad por favor llámanos al 510-231-3031.

Su participación en esta encuesta es muy importante especialmente puesto que su hogar es uno del pequeño numero que está siendo encuestado. Por favor, ayúdenos a darle forma al futuro de Richmond. Gracias por su tiempo y participación.

Sinceramente,

William A. Lindsay Gerente de la Ciudad

ENCUESTA DE LA COMUNIDAD DE LA CIUDAD DE RICHMOND 2007

Por favor complete este cuestionario si usted es el adulto (18 años o más) de su casa que más recientemente haya celebrado su cumpleaños. El año de nacimiento del adulto no importa. Por favor encierre en un círculo la respuesta que mejor represente su opinión en cada pregunta. Sus respuestas son anónimas y solo serán reportadas en forma general.

1.	Por favor encierre en un círculo en el número que mejor represente	e su opinión para	cada una de l	as siguientes	preguntas:	
		<u>Excelente</u>		Pasable	<u>Bajo</u>	<u>No sé</u>
	¿Cómo evalúa a Richmond como lugar de residencia?	1	2	3	4	5
	¿Cómo evalúa su vecindario como lugar de residencia?		2	3	4	5
